How we do it

Your dedicated Qlik Project Manager works closely with your team to capture and collate requirements, design, and develop solutions, as well as implement Qlik products and services within your organization. You'll have clear descriptions and close management of all technical and non-technical project activities, documents, and deliverables throughout all phases of a Qlik project: Discovery, Execution and Deployment.

Discovery Phase	Execution Phase	Deployment Phase
Your Qlik project starts off with the definition of requirements, a clear project plan, and governance the entire team understands.	*Your Qlik application is developed in agile timeframes and installed. We lead Quality Assurance with testing for usability, functionality, security and scalability.*	*Users are trained and your Qlik application is rolled out with a smooth hand off to your Support and Operations teams.*
Discovery Workshop • Goals and KPIs • User and system requirements • Detailed project plan • Budget, timeframe, and resources • Feasibility analysis • Governance	Agile development of dashboards and visualizations • Planned sprints • Daily meetings • Review and retrospectives • Iterative releases • Data Modeling • Platform installation and configuration • Quality Assurance and testing	Customized rollout • Training • Documentation • Handover to Support and Operations • Lessons learned • Best practices • Project sign-off

With a proven project management methodology in the hands of experienced Qlik project managers who work in partnership with your internal team, you are ensured a best-in-class, secure, and scalable implementation that comes in on time, in scope, and on budget.
