

Department of Homeland Security

How data discovery strengthens operations

From deterring terrorist attacks and safeguarding national borders to responding to major emergencies and disasters, the Department of Homeland Security (DHS) protects the American people and their freedoms and homeland.

Unifying national security efforts—and garnering citizen confidence—requires coordination across multiple agencies, programs and personnel. Qlik helps support these efforts by improving access and insight into the department’s vast data repository.

Acquisition Management

Cross-department insight into acquisition data enables DHS to make more informed purchasing decisions, accurately forecast demand, avoid redundant purchases, and identify potentially risky suppliers.

Qlik® empowers DHS to maximize savings and ensure compliance by exploring procurement data from every angle. Rather than constraining exploration with predetermined reports, Qlik allows anyone to rapidly create visualizations to reveal purchasing patterns and identify opportunities for consolidation. Users get a holistic view of contract and compliance data, enabling them to easily answer questions such as “Which contract vehicles are we using the most?” and “Have I hit my small business utilization metrics?”.

Human Capital Management

Ensuring DHS has the right people to accomplish its mission is key. By empowering Human Resources and program managers to explore workforce data from every angle, Qlik® provides a complete view of the workforce in a single interface. Users have visibility into all data—including retirement eligibility, occupation and competency gaps, and recruitment and development needs—enabling DHS to proactively address skill gaps and ensure the safety of our homeland.

Qlik® unlocks the power of information

Find your “aha” moment

Uncover hidden insights or anomalies by viewing all your data. You’ll be able to see and explore not only what data is associated to your selected query, but also what’s unrelated, which can provide unexpected insights.

Search data like you do the web

Searching the web is easy. Why should your data be any different? Find what you’re looking for quickly, so you can move on to the next question.

Be empowered, everywhere

Don’t wait to get to the office. Get answers to your questions anywhere, on any device, with an intuitive interface designed for mobility.

Share your story

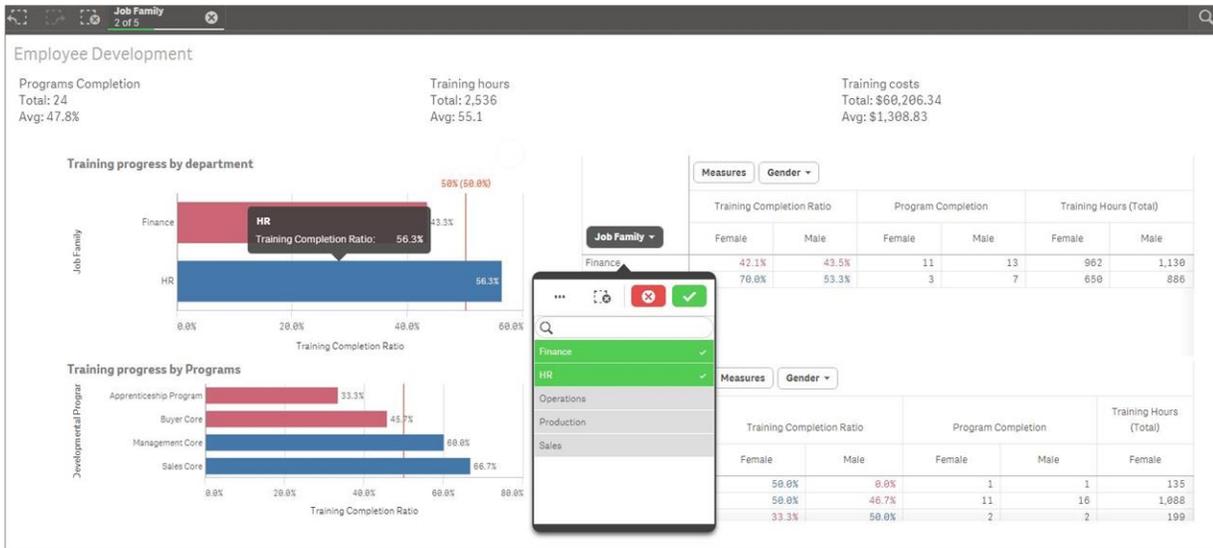

Save time and keep your presentations on track. Create and publish findings in one place, so you can shift seamlessly from discovery mode to presentation mode and back.

Receive answers immediately

Get up and running in a matter of days, not months. 44% of Qlik® customers are live within a month; 77% are live in fewer than 3 months.

Minimize purchasing headaches

Software buying should be easy. We work with you throughout the procurement process, offering flexible and scalable license models to deliver outstanding performance and low TCO to user communities consisting of 1 to 50,000+ people.

Cyber Analytics

While attackers vary dramatically, ranging from foreign governments to nascent hackers, one thing they share is their ability to evolve quicker than we can currently defend. This delta is what some refer to as the “Innovation Gap”, a widening chasm that DHS is determined to correct as it overhauls cybersecurity; however, developing the best approach to defend against these attackers is no small task.

Qlik® can help better manage cyber threats by providing a single, holistic view of cyber data and program performance in one interactive application. By bringing together multiple disparate data sources, Qlik® empowers users to identify when and where incidents are occurring, analyze trends, track progress, and improve efficiency. So DHS can identify and correct any flaws and make the necessary improvements to cybersecurity.

About Qlik®

Qlik® is a leader in data discovery, delivering intuitive solutions for self-service data visualization and guided analytics. Qlik® empowers the organization with a flexible analytics tool that not only answers queries, but also helps uncover additional questions to ask of the data. Qlik’s® products deploy rapidly and customers realize rapid time to value, often in less than 45 days. Contact us at UncleSam@qlik.com to schedule a discussion and live demonstration, or visit us at www.qlik.com.
