

# The SMART Analytics Adapter by Qlik®

What would access to analytics, directly in the workflow of the EHR, do for your clinicians?

- Inform decision making, enabling improved outcomes?
- Speed decision making, having information seamlessly available?
- Focus decision making, efficiently using clinician time?

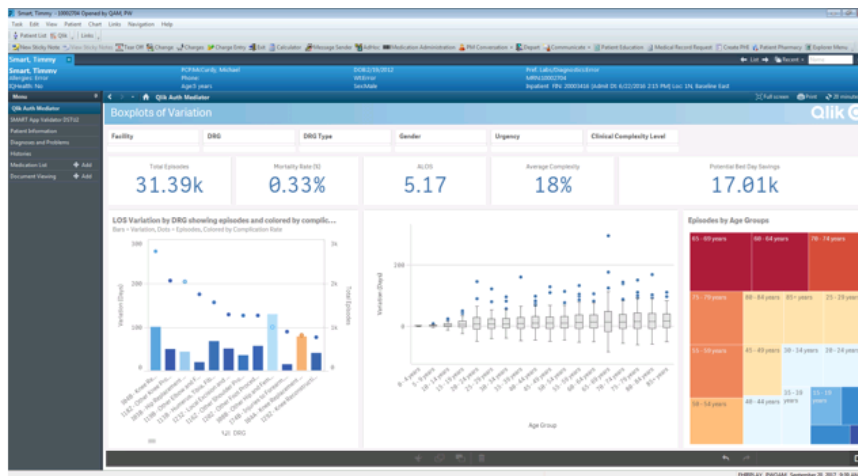

**Embedded analytics would do these three things and more.**

The SMART Analytics Adapter by Qlik enables Cerner Millennium users to embed Qlik Sense® analytics directly into workflows. This allows your clinical decision makers to layer and view relevant information, uncover new insights, and use those insights to promote better clinical and business decisions.

## How does it work?

The SMART Analytics Adapter functions like other APIs – it connects Cerner and Qlik, integrating reports, scorecards and dashboards within the EHR. Clinicians can now seamlessly navigate across patient records, view practice pattern trends and clinical variations – all with a single login.

The SMART Analytics Adapter receives context from the user’s interaction within Millennium and allows the opening of dashboards already filtered to reflect the same patient set or details that were being viewed in the medical record.

## What's required to run the SMART Analytics Adapter?

- Qlik Sense® 3.2 or higher
- Cerner Ignite on the Millennium platform

## Who do I contact to learn more?

Qlik will gladly answer your questions and show you a demo. Contact us via email at [Matt.Stephens@Qlik.com](mailto:Matt.Stephens@Qlik.com) to get a conversation started. The SMART Analytics Adapter will be featured soon in Cerner's app gallery [EHR API | Cerner Code- Developer Portal](#)

## The Qlik Associative Engine – Different by Design

---

At Qlik, we've solved the biggest problem with modern BI tools – restricted linear exploration. Our associative technology brings all your data together without complex data warehouses, and enables users to freely explore in any direction they want.

**It's simple. Qlik delivers insights you will miss with other tools.**

### Access to All Relevant Data Sources

Easily combine and load data from large numbers of disparate data sources

### Self-service Exploration without Boundaries

Freely explore and probe the possible associations in your data, using interactive selections and global keyword searches, without boundaries or restrictions

### Insights at the Speed of Thought

Empower clinical care teams to immediately interact with and analyze information, at the point of care

## About Qlik

A seven-year Gartner Magic Quadrant Leader, Qlik delivers intuitive data analytics solutions to more than 2,500 healthcare customers across the globe. Our world-class industry solutions, combined with our comprehensive consulting, training, and support services, ensure our customers get the most from their Qlik implementations. We bring specific healthcare industry and functional-level experience to our customers, driving rapid understanding of your unique clinical and business problems.
