

Qlik® Continuous Classroom

Enabling non-stop learning

As the way we consume information becomes increasingly sophisticated, we no longer expect to learn the way we used to. We need more than an individual event like a class or webinar. For your learning journey to be truly effective in the complex world where we live and work today, you will want to follow a constant learning process to supplement these events. And you will expect that process to be supported by the latest tools and technology available today.

Qlik Continuous Classroom uses this innovative approach to help you maximize your Qlik Sense® skills. It's a self-service learning platform that lets you define your own learning path: you choose what you want to learn, when and how. You select the right content for you from a regularly updated library, using a learning method that works best for you. Through a platform that is available for one year and is always accessible, you can learn at your own pace.

The screenshot shows the Qlik Continuous Classroom website. At the top, there is a navigation bar with 'HOME', 'QLIK.COM', and 'NAVIGATION'. Below this is a main content area with four large buttons: 'Introduction' (Welcome), 'Free modules' (Try it now), 'View calendar' (See what's coming), and 'View FAQs' (Need answers?). Below these buttons, there is a section for 'New users may prepare to learn and returning users may engage in learning pathways.' with 'Prepare to Learn' and 'Learning Pathways' buttons. A search bar for modules is present. On the right, there is a 'Side Menu' section with a hamburger menu icon and a note about navigation features. Below the search bar, there is a 'RECENTLY ADDED' section with three module cards. Each card includes a title, a date, a brief description, and a 'NEW MODULE' label. The first card is 'Working with Variables (Q3 2.1)', the second is 'Limit Dimensions Displayed (Q3 2.1)', and the third is 'Introduction to Set Expressions (Q3 2.1)'. At the bottom right, there is a 'Navigation' section with links for 'Home', 'My home', 'My profile', and 'My courses', and an 'Administration' section with a link for 'My profile settings'.

“Qlik Continuous Classroom is another example of how Qlik is delivering innovative solutions and approaches.”
Frank Kozurek, Head of Business Intelligence, National Express

Defining your own learning path

Choose **what** you want to learn

With Qlik Continuous Classroom, you can build your own learning path by choosing the content you want to learn, or if you prefer, conveniently select from pre-defined paths. You can easily browse the library, or search for specific modules. And since Qlik Sense is frequently updated with new and improved features, we regularly add new content to the library as well. This helps ensure that you have access to the latest training available for your level, and can take advantage of every new feature and function from the newest product release.

Choose **how** you want to learn

Since everyone retains information differently, a one-size-fits-all approach to learning is rarely effective. That's why Qlik® Continuous Classroom adapts to each student's learning style by offering a wide variety of tools and activities to support your learning journey. Through videos, exercises, quizzes and more, you can advance your skills using an approach that works best for you. You can even interact directly with instructors and peer students, leveraging web conferencing tools and forums at your disposal to quickly get answers, as well as share best practices. For immediate support, instructors are available during virtual office hours and live webinars.

Choose **when** you want to learn

Because Qlik Continuous Classroom is always accessible, you decide when to start, stop and resume. You can take exercises and assessment tests at your own convenience. You are able to leverage all the tools Qlik Continuous Classroom provides as often as you would like during your subscription period. And you even have the ability to go back to a course you previously completed for a refresh.

How to get started

You can get started right away! Visit qcc.qlik.com to try it, sign up and begin your learning journey.
