

Unlocking Value from SAP Data

Data modernization and real-time integrated analytics

Challenge

Need for enabling real time insights from SAP and Mainframe environments for automating key processes such as Quote to Cash.

Solution

Developed an AWS-based data lake with purpose-built analytics services for simplified and real time access to SAP and DB2/ZOS data through real time CDC streaming using Qlik Data Integration.

Results

- 70% accelerated time to value and 35% cost reduction
- End to end data pipeline management, granting visibility, transparency, and control via a “single pane of glass” monitoring

QLIK.COM

Solution Overview

Customer Name

Schneider Electric

Industry

Manufacturing

Geography

Massachusetts, USA

Function

IT

Business Value Driver

Reimagined Processes

Primary Source & Target

Sources: SAP, DB2/zOS
Target: AWS

“The ability to more easily access and integrate SAP data for analysis to enhance decision-making unlocks a significant source of value from one of our most important data assets. With Qlik Data Integration feeding our AWS environment with SAP, we are better positioned to unlock the value of our SAP data as part of our larger journey to being fully data-driven across the organization.”

Clint Clark, VP Finance Performance Systems and Data
