# Get Ready for Modern DataOps

Qlik® Start-Up Services for Data Integration

LEAD WITH DATA™ Qlik Q

You're ready to use our data integration solutions so you can quickly find and free analytics-ready data — and take action on it. Given the size and complexity of your business, you'll likely face unique environmental requirements in deploying across a variety of sources, targets and use cases. You'll also benefit from guidance and expertise as you get started on your journey with a modern data architecture.

Qlik Start-Up Services for Data Integration accelerates your engagement with Qlik by delivering a prescriptive package of services designed to get you up and running with our platform the right way. Whether it's CDC Streaming, Data Lake Creation, or Data Warehouse Automation, we help you realize the most value from our solutions with the optimal mix of services and resources to enable modern DataOps for your organization.

Get started with Qlik Data Integration

Our Professional Services organization is focused on getting your Qlik Data Integration solutions into production as quickly as possible – implementing everything you need the right way, the first time, increasing time to value for your deployment. This includes enabling you on our products with training and knowledge transfer built into the packages.

We will collaboratively guide you to a successful enablement and implementation, from architecture all the way to go-live. We'll help you find and move relevant data for transaction offloading, reporting, query optimization, and building the data warehouse and data marts that will feed your business objectives. We will provide a solution delivery methodology, built upon 20 years of experience and best practices, and specifically designed to improve the success of your project.

Our Start-Up Packages

We have designed the best mix of services and resources to get you up and running and on your way. Choose your package based on the solution you're looking to deploy.
