

Identifying Fraud, Waste and Abuse in Federal Government

Visual Analytics Can Improve Spend Accuracy

The new Administration is here. Data calls are coming and there will be increased scrutiny on Federal spending. Imagine being asked to respond to these questions at a moment's notice:

- What was our agency's spend on services?
- What about spend on IT infrastructure?
- How did we validate vendor spend across our agency?

Qlik's Data Discovery platform empowers agencies to ask any question, in turn enabling you to quickly respond to the data call of the day—whatever that might be.

Detect Suspicious Activity & Fraud

Qlik helps the world's largest insurance and financial organizations detect fraud through improved analytics. Strengthening fraud detection through analytics is a major initiative for the new administration—one that's heavily powered by discovery of the unexpected. While many analytical tools exist to generate predictive models and visualizations, most fall short in enabling non-technical business users (fraud analysts, investigators, security and policy advisors, etc.) to navigate their data.

With Qlik, organizations can quickly search and interrogate data from all systems – allowing everyone in the agency to navigate their data and create interactive visualizations and sophisticated analysis.

One of the world's largest insurance companies recognized

\$26M in claims fraud savings with Qlik

and **eliminated \$7M**

in software maintenance costs by replacing their existing BI tool with Qlik.

Qlik unlocks the power of information

Find your "aha" moment

Uncover hidden insights or anomalies by viewing all your data. You'll be able to see and explore not only what data is associated to your selected query, but also what's unrelated, which can provide unexpected insights.

Search data like you do the web

Searching the web is easy. Why should your data be any different? Find what you're looking for quickly, so you can move on to the next question.

Be empowered, everywhere

Don't wait to get to the office. Get answers to your questions anywhere, on any device, with an intuitive interface designed for mobility.

Share your story

Save time and keep your presentations on track. Create and publish findings in one place, so you can shift seamlessly from discovery mode to presentation mode and back.

Get answers now

Be up and running in a matter of days, not months. 44% of Qlik customers are live within a month; 77% are live in fewer than 3 months.

Minimize purchasing headaches

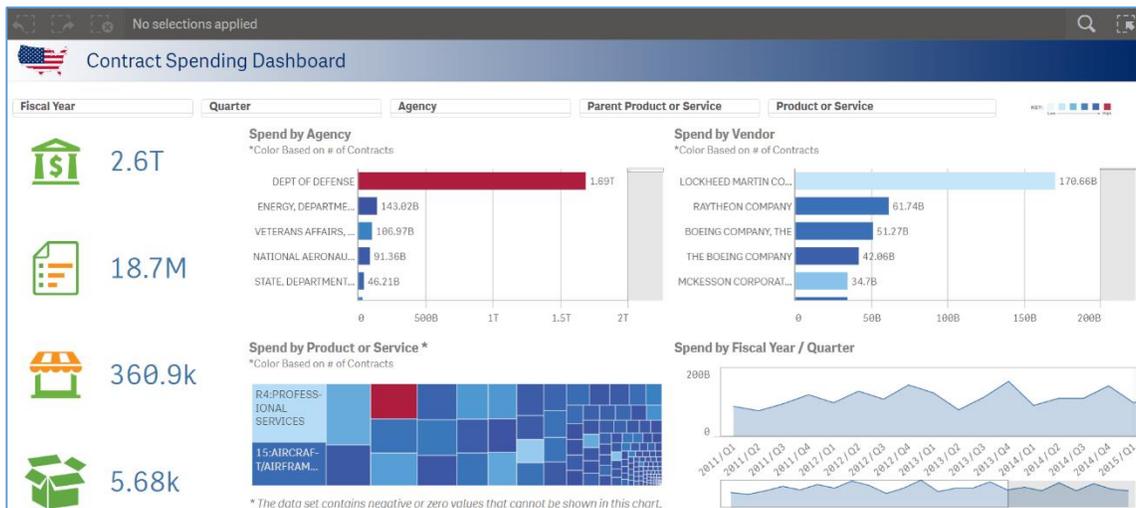

Software buying should be easy (and fun!). We work with you throughout the procurement process, offering flexible and scalable license models to deliver outstanding performance and low TCO to user communities consisting of 1 to 50,000+ people.

Rapidly spot trends, patterns, and outliers to detect potential signs or suspects of fraud. Investigate suspicious activities and transactions, missing and duplicative information, watch lists, and case management. Additional uses include transactional pattern analysis and insider threat detection.

Users explore, analyze, and modify their analysis with simple mouse clicks to discover findings by following their natural process of interrogation.

Reduce Wasteful Spending

Federal spending is under more scrutiny than ever before. Reducing wasteful, yet often unintentional, spending is another chief focus of the Trump administration. Professional service fees, project overruns, IT maintenance and even government employees' salaries all find themselves under the microscope, just to name a few.

Qlik enables agencies to get ahead of the scrutiny by enabling you to combine all spend data—from the smallest contract line items (CLINS) at the individual project level, to the most macro government-wide spend in the Federal Procurement Data Set. In a matter of seconds, Qlik can search tens of millions of contract descriptions, showing individual agency spend, which suppliers were used, which category the spend fell under, etc.

This type of insight enables you to proactively reduce waste by reducing contract duplication and increasing sharing. It also frees up contracting officers, enabling them to focus on mission-critical acquisitions.

About Qlik

Qlik is a leader in data discovery, delivering intuitive solutions for self-service data visualization and guided analytics. Qlik's products deploy rapidly and customers realize rapid time to value, often in less than 45 days. Contact **Tim O'Toole** at Tim.O'Toole@qlik.com or **(703) 477-9950** to schedule a discussion and live demonstration, or visit us at www.qlik.com.
