Unlock Real-time Actionable Insights in Your SAP Data with Qlik® End-to-End Solutions

Qlik Solutions for SAP Data

The Data-Value Gap

Business success depends on your ability to make real-time decisions for competitive advantage, to anticipate market changes, and to efficiently deliver products and services. But most organizations struggle to make actionable data insights available, let alone turn it into business value. Customers with legacy systems, which store valuable data, are facing a need for data modernization.

Leverage Your SAP Data to Unlock Value

One of the reasons the data-value gap exists is that the current data architectures limit the flexibility and agility demanded by fast-evolving digital business requirements. What’s needed are solutions built on Intelligent Data Analytic Pipelines that can streamline the way organizations source, integrate, and provision actionable governed data. SAP data is at the core of most organization’s operations, and Qlik Solutions for SAP data can help organizations unlock the value.

- **Real time**: Immediately provide data updates and business decisions
- **Cloud native**: Efficiently store data that is accessible from anywhere, anytime
- **Agile**: Quickly react and respond to new business requirements
- **Actionable**: Empowers all your users — technologists or lines of business, expert and novice — to take action with data
Qlik Solutions for SAP Data

Accelerate the ROI of your data modernization efforts. Qlik’s solution and accelerators* include:

**Order-to-Cash Analytics**
Gain real-time visibility into your sales orders, fulfillment, and accounts receivables performance

**Finance Analytics**
Optimize financials data reporting, and gain new insights into your P&L, financial risk, and profitability

**Inventory Analytics**
Improve your planning and inventory management, costs, and utilization for increased efficiencies

**Benefits**
Potential benefits of Qlik SAP Solutions:

- Blueprint of how to modernize data architectures and intelligent data analytics pipelines
- Faster time to value from solution pre-built accelerators*
- Decrease in infrastructure and data integration costs
- Gains in business efficiencies in areas like working capital, sales order fulfillment, inventories, and more
