# Qlik Q®

Unlock Real-time Actionable Insights in Your SAP Data with Qlik® End-to-End Solutions

Qlik Solutions for SAP Data

The Data-Value Gap

Business success depends on your ability to make real-time decisions for competitive advantage, to anticipate market changes, and to efficiently deliver products and services. But most organizations struggle to make actionable data insights available, let alone turn it into business value. Customers with legacy systems, which store valuable data, are facing a need for data modernization.

10% Business-relevant data used for analysis[1]

32% Executives who say they can create value from data[2]

24% Business decision makers who feel data literate[3]

Leverage Your SAP Data to Unlock Value

One of the reasons the data-value gap exists is that the current data architectures limit the flexibility and agility demanded by fast-evolving digital business requirements. What's needed are solutions built on Intelligent Data Analytic Pipelines that can streamline the way organizations source, integrate, and provision actionable governed data. SAP data is at the core of most organization's operations, and Qlik Solutions for SAP data can help organizations unlock the value.

Real time
Immediately provide data updates and business decisions

Cloud native
Efficiently store data that is accessible from anywhere, anytime

Agile
Quickly react and respond to new business requirements

Actionable
Empowers all your users — technologists or lines of business, expert and novice —to take action with data

Qlik Solutions for SAP Data

Accelerate the ROI of your data modernization efforts. Qlik's solution and accelerators* include:
